## **UI Manager Properties**

hroughout this book are tables that list the property names and data types for all the UIResource elements of specific Swing components. Although these tables show all the information about a specific component, it is handy to have the information about property names for all of the components in one place.

With that in mind, this appendix provides a complete, alphabetical list of properties used by the predefined look and feel classes—Motif, Metal/Ocean, Windows, GTK, and Synth—provided with the Swing release for the Java 2 Platform Standard Edition, version 5.0 (J2SE 5.0). The table indicates with an *X* which of the five look and feel classes uses a particular property. For properties defined within the base Basic look and feel, these are assumed to be used by all the look and feel types, since all of the system-defined look and feel classes extend from BasicLookAndFeel. It is possible that a subclass masks the use of a property defined for the Basic look and feel, and in fact doesn't physically use one flagged as such in the table. Also, since the GTK look and feel is a subclass of Synth, a similar situation arises with GTK, too.

To change the default setting for any of these properties, you need to notify the UIManager by storing a new setting in the lookup table of the UIManager. For instance, to change the default text for the Yes button in a JOptionPane, you need to replace the OptionPane.yesButtonText property with the new setting (Si, in this example):

```
UIManager.put("OptionPane.yesButtonText", "Si");
```

Then any component created after the setting change will get the new value: Si. If you want a displayed component to get the new setting, you must call its updateUI() method after changing the setting.

When you change the current look and feel, any custom settings you install may be lost. If the class of the property value setting implements the UIResource interface (an empty marker interface such as Serializable), the setting will be replaced by the default setting of the look and feel. For example, the following setting would be saved when the look and feel changes:

```
UIManager.put("OptionPane.background", Color.RED);
```

Conversely, the following setting would not be saved when the look and feel changes:

```
UIManager.put("OptionPane.background", new ColorUIResource(Color.RED));
```

If the property value setting does not implement the UIResource interface, the property setting is retained when the look and feel changes.

**Note** The specific set of available properties changes with each JFC/Project Swing release. The listing here reflects the current settings for J2SE 5.0. Some properties did not exist in earlier versions, and others may get replaced in later versions. The changes tend to be minor, but they do exist.

- a. Lowercase "b" is correct.
- b. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- c. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- d. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- e. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- f. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- g. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- h. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- i. Flattened ComponentInputMap pieces. Describes the InputMap, with every even number item being a String giving the KeyStroke as specified in KeyStroke.getKeyStroke(String) (or a KeyStroke), and every odd number item the Object used to determine the associated Action in an ActionMap.
- j. Deprecated, do not use. Property still set and available though.
- k. Deprecated, do not use. Property still set and available though.

# **INDEX**

Α	PlainDocument class as specific
AbstractAction class, 170	implementation of, 541
default implementation of Action	properties, 540
interface, 38	setDocumentFilter() method, 542
lookup property keys, 41	AbstractDocument.Content class
properties, 41	implementations, 596
Swing-specific event handling, 37	AbstractFormatter class
TextAction class as extension of, 535	as mask for formatted text, 566
using actions, 38–41	AbstractFormatterFactory class, 566
AbstractBorder class	as mask for formatted text, 566
creating, 216	AbstractLayoutCache class
extending to create borders, 232	implements RowMapper interface, 670
implements Border interface, 212	AbstractListModel class, 451
javax.swing.border package, 216	extended by DefaultComboBoxModel
methods, 217	class, 460
AbstractButton class	introduction, 452
as parent class, 64	subclassing, 462
ButtonModel interface, 99	AbstractSpinnerModel class
components grouped into ButtonGroup	AbstractSpinnerModel class
class, 115	implements, 514
DefaultButtonModel interface, 99	introduction, 513
handling events, 102	SpinnerListModel class implements, 513
icons, 102	SpinnerNumberModel class
internal positioning, 102	implements, 513
mnemonics, 101	AbstractTableModel class
parent class to JButton class, 67	data storage, 676
properties, 98	enabling default table cell renderers,
AbstractCellEditor class, 623, 676	694–695
creating CheckBoxNodeEditor class	introduction, 691, 692
653–658	specifying fixed JTable columns, 692–694
managing CellEditorListener objects, 653	AbstractUndoableEdit class, 783, 788
AbstractColorChooserPanel class, 301	subclassing, 798
getDefaultChooserPanels() method, 320	UIResource Elements, 791
implementing methods, 313	Abstract Window Toolkit (AWT), 1
installChooserPanel() method, 312	accelerator property
represented by tabs in upper part of	JMenu class, 171
JColorChooser, 310	JMenuItem class, 164
subclassing, 311	acceleratorForeground property
AbstractDocument class, 521	MetalLookAndFeel class, 772
attaching DocumentFilter to, 538	accelerators, 46
introduction, 540	

acceleratorSelectedForeground property JOptionPane class, 281 MetalLookAndFeel class, 772 IPasswordField class, 564 accept() method JPopupMenu class, 179 JProgressBar component, 440 filechooser class, 331 acceptAllFileFilter property IRadioButton class, 136 JFileChooser class, 327 JRadioButtonMenuItem component, 191 acceptAllFileFilterUsed property JRootPane class, 237 JFileChooser class, 327 JScrollBar component, 426 accessibility, 805 JScrollPane class, 407 classes, 805, 806 JSeparator class, 175 Accessible interface, 806 JSlider component, 431 AccessibleContext class, 806 JSpinner class, 510 creating accessible components, 807 JSplitPane class, 385 Java Access Bridge, 808-810 JTabbedPane class, 399 accessibility classes ITable class, 681 javax.accessibility package, 805 JTableHeader class, 716 Accessible interface, 806 ITextArea class, 571 implementation of, 807 ITextComponent class, 523 accessibleAction property JTextField class, 529 AccessibleContext class, 806 JToggleButton class, 120 JToolBar class, 203 accessibleChildrenCount property JToolTip class, 85 AccessibleContext class, 806 accessibleComponent property ITree class, 628 AccessibleContext class, 806 JViewport class, 412 AccessibleContext class JWindow class, 248 extending JComponent. ProgressMonitor class, 296 Accessible J Component, 807 accessibleDescription property introduction, 806 AccessibleContext class, 806 setAccessibleDescription() method, 807 accessibleEditableText property accessibleContext property AccessibleContext class, 806 Box class, 379 accessibleIcon property JButton class, 105 AccessibleContext class, 807 accessibleIndexInParent property ICheckBox class, 127 JCheckBoxMenuItem component, 185 AccessibleContext class, 807 IColorChooser class, 307 Accessible ILabel class IComboBox class, 492 ILabel class, 806 JComponent class, 79 accessibleName property JDesktopPane component, 263 AccessibleContext class, 807 Accessible ILabel class, 806 JDialog class, 250 JEditorPane class, 575 accessibleParent property IFileChooser class, 327 AccessibleContext class, 807 IFrame class, 243 accessibleRelationSet property IInternalFrame class, 254 AccessibleContext class, 807 ILabel class, 89 accessibleRole property JLayeredPane class, 242 AccessibleContext class, 807 IList class, 464 accessibleSelection property IMenu class, 171 AccessibleContext class, 807 accessibleStateSet property IMenuBar class, 159 IMenuItem class, 164 AccessibleContext class, 807

accessible Table property listening to JMenuItem events, 166 AccessibleContext class, 807 listening to JTextField events, 556 accessibleText property actionListeners property AccessibleContext class, 807 AbstractButton class, 98 accessible Value property IComboBox class, 492 AccessibleContext class, 807 ITextField class, 529 Timer class, 36 accessory property JFileChooser class, 327 ActionMap class Action interface InputMap class, 37 as extension of the ActionListener Keymap interface, 554 interface, 37, 170 sharing instances to share actions, 44 definition, 37 actionMap property Swing-specific event handling, 37 JComponent class, 41, 79 Action objects actionPerformed() method, 21 adding to JMenuBar class, 589 actions property Swing text components come with, 585 JFormattedTextField class, 567 action property JTextComponent class, 523, 535 AbstractButton class, 98 ITextField class, 529 JComboBox class, 492 ActiveValue class, 755 JTextField class, 529 constructing JLabel components, 757 actionCommand property activeWindow property AbstractButton class, 98 KeyboardFocusManager class, 55 DefaultButtonModel interface, 100 add() method ButtonGroup class, 117 IButton class, 107 JComboBox class, 492 Container class, 157, 381, 397 JTextField class, 529, 557 DefaultListModel class, 453 ActionEvent event DefaultMutableTreeNode interface, 662 IButton class, 107 IMenu class, 169 ActionFocusMover class JMenuBar class, 158 programmatically moving focus, 49 JPopupMenu class, 177 ActionListener interface JToolBar class, 203 AbstractButton class, 102 addActionForKeyStroke() method Keymap interface, 45 Action interface is extension of, 37, 170 adding to JFileChooser class, 324, 325 addActionListener() method creating, 19 IButton class, 20 creating to handle input focus, 48 addAuxiliaryLookAndFeel() method customizing for JColorChooser class, UIManager class, 776 addCellEditorListener() method 305-307 focusNextComponent() method, 48 CellEditor interface, 654 handling JCheckBox selection events, 130 addChoosableFileFilter() method handling JCheckBoxMenuItem selection IFileChooser class, 330 events with ItemListener, 186 addChooserPanel() method handling JRadioButton selection events, JColorChooser class, 314 139, 140 addComponent() method Seven-Button GridBagLayout example, 352 handling JRadioButtonMenuItem addCustomEntriesToTable() method selection events, 190, 192 handling JToggleButton selection MetalLookAndFeel class, 774 events, 121 addEdit() method listening to JComboBox events, 493-496 CompoundEdit class, 791

UndoManager class, 792

addElement() method	asynchronousLoadPriority property
DefaultListModel class, 453	AbstractDocument class, 540
addLayoutComponent() method	AttributeContext interface, 595
LayoutManager interface, 345	attributeCount property
LayoutManager2 interface, 345	SimpleAttributeSet class, 598
addListSelectionListener() method	attributeNames property
JList class, 476	SimpleAttributeSet class, 598
addSelectedInterval() method	attributes property
JList class, 479	HTMLDocument.Iterator class, 609
addSeparator() method	AttributeSet interface, 585
JMenu class, 169, 175	changing and checking status with
JPopupMenu class, 177, 178, 182	StyleConstants class, 603
JToolBar class, 208	constants, 598, 599
addTab() method	introduction, 597
JTabbedPane class, 398	setting JTextPane text attributes, 580
addUndoableListener() method	SimpleAttributeSet class
UndoableEditSupport class, 794	implementation, 597
AdjustmentListener interface	specifying with Style interface, 606
handling JScrollBar events, 423	styles, 595
adjustmentListeners property	autoCreateColumnsFromModel property
JScrollBar component, 426	JTable class, 681, 708
alignment property	autoResizeMode property
TabStop class, 604	JTable class, 681
alignmentX property	autoscrolls property
JComponent class, 78	JComponent class, 79
alignmentY property	auxiliaryLookAndFeels property
JComponent class, 78	UIManager class, 748
allFrames property	AWT (Abstract Window Toolkit), 1
JDesktopPane component, 263	AWT 1.1 event model
allowsChildren property	handling JScrollBar events, 423
DefaultMutableTreeNode interface, 663	AWT components
AncestorListener event handler	AWT containers compared to Swing
JComponent class, 81	containers, 235
anchorSelectionIndex property	distinction between equivalent Swing
DefaultListSelectionModel class, 475, 683	components, 3
JList class, 464	layout managers, 343
anchorSelectionPath property	mapping to Swing components, 3
JTree class, 628, 630	replacements, 3
approveButtonMnemonic property	resizing, 388
JFileChooser class, 327	Swing menu components, 156
approveButtonText property	to Swing Window mapping, 4
JFileChooser class, 327	AWTEvent class
approveButtonToolTipText property	getID() method, 257
JFileChooser class, 327	AWTEventMulticaster class
armed property	
DefaultButtonModel interface, 100	managing listener lists, 29, 31, 32 AWTKeyStroke class
	KeyStroke class as subclass of, 42
JMenuItem class, 164	REYOU ORE CIASS AS SUUCIASS 01, 42
ArrayList class	
converting data structure to ListModel, 453	

■B	BorderLayout manager, 204
background property	default layout manager for JApplet
Component class, 682	class, 252
DefaultTreeCellRenderer class, 635	borderOpaque property
JComponent class, 78	CompoundBorder class, 227
backgroundNonSelectionColor property	LineBorder class, 220
DefaultTreeCellRenderer class, 635	TitledBorder class, 229
backgroundSelectionColor property	borderPainted property
DefaultTreeCellRenderer class, 635	AbstractButton class, 98
backgroundSet property	JMenuBar class, 159
JComponent class, 78	JPopupMenu class, 179
BadLocationException class, 599	JProgressBar component, 440, 441
BasicColorChooserUI class, 309	JToolBar class, 203
BasicComboBoxEditor class	borderPaintedFlat property
javax.swing.plaf.basic package, 499	JCheckBox class, 127, 128
BasicDirectoryModel class	borders, 211
ListModel implementation, 452	basics, 211
BasicLookAndFeel class, 741	AbstractBorder class, 216
initClassDefaults() method, 771	Border interface, 212
look and feel classes extend from, 813	BorderFactory class, 215
BasicMenuUI class, 199	creating, 232, 234
BasicSplitPaneDivider subclass, 389	predefined borders, 218
BasicSplitPaneUI subclass	BevelBorder class, 220
createDefaultDivider() method, 389	CompoundBorder class, 226
BasicTextAreaUI interface, 60	EmptyBorder class, 218
beginUpdate() method	EtchedBorder class, 223
UndoableEditSupport class, 794	LineBorder class, 219
BevelBorder class, 220	MatteBorder class, 224
methods, 221	SoftBevelBorder class, 222
bidiRootElement property	TitledBorder class, 227
AbstractDocument class, 540	borderSelectionColor property
black property	DefaultTreeCellRenderer class, 635
MetalLookAndFeel class, 772	bottomComponent property
blinkRate property	JSplitPane class, 385, 386
Caret interface, 548	bounded range components
blockIncrement property	available components, 419
JScrollBar component, 421, 426	BoundedRangeModel interface, 419
Border interface	DefaultBoundedRangeModel class, 420
javax.swing.border package, 212	JProgressBar class, 439–447
methods, 212	JScrollBar class, 421–428
border property	JSlider class, 428–438
JComponent class, 78, 441	BoundedRangeModel interface
JViewport class, 412	definition, 420
TitledBorder class, 229	getModel() method, 426
BorderFactory class	JTextField class, 447, 449
javax.swing package, 215	properties, 419
BorderLayout class	bounds property
introduction, 347, 348, 349	JComponent class, 77
using LayoutManager2 interface, 345	, <del></del>
0 , 0	

Box class	CannotUndoException class, 784, 790
BoxLayout class as default layout manager	CardLayout class
of container, 357	compared to JTabbedPane class, 394
creating, 378	introduction, 357
creating areas that grow, 380–381	using LayoutManager2 interface, 345
creating rigid areas, 382–383	caret category of properties
introduction, 377	JTextComponent class, 524
properties, 379	Caret interface, 522
Box.Filler class. See Filler class	introduction, 547–550
BoxLayout class	properties, 548
as default layout manager of Box class, 377	caret property
creating, 358	JTextComponent class, 523
filling box with JLabel, JTextField, and	caretColor property
JButton, 378	JTextComponent class, 523
growing components, 380	CaretEvent class
introduction, 357, 358	introduction, 550-552
laying out components, 359	CaretListener interface
with different alignments, 362	associating with JTextComponent, 550
with same alignments, 359–361	introduction, 550–552
laying out larger components, 363, 364	caretListeners property
layout manager for JMenuBar class, 381	JTextComponent class, 523
breadthFirstEnumeration() method	caretPosition property
DefaultMutableTreeNode class, 665	JTextComponent class, 523
ButtonGroup class	caretUpdate() method
grouping JRadioButton components in,	CaretListener interface, 551
136–139	cell editor, 718
grouping objects into, 98	creating complex version, 722–724
introduction, 116–118	creating simple version, 718–722
logical grouping of AbstractButton	CellEditor interface, 644
components, 115	and CellEditorListener interface
placing JCheckBoxMenuItem component	methods, 650
in, 184	creating the CheckBoxNodeEditor class, 653
placing JRadioButtonMenuItem	editing tree nodes, 644
components within, 189	methods, 654–655
ButtonModel interface, 98	getCellEditorValue() method, 654
AbstractButton class, 99	isCellEditable() method, 648
DefaultButtonModel class implements, 115	cellEditor property
Delatitudition violer class implements, 113	JTable class, 681
C	JTree class, 628
Calendar class	TableColumn class, 713
constants, 514	CellEditorListener interface
calendarField property	definition, 650
SpinnerDateModel class, 515	list of objects managed by
cancelCellEditing() method	AbstractCellEditor class, 653
CellEditor interface, 654	cellEditorValue property
canceled property	DefaultCellEditor class, 647
ProgressMonitor class, 296	
canImport() method	cellRenderer property JList class, 464, 469
TransferHandler class, 734	
CannotRedoException class, 784, 790	JTree class, 628
	TableColumn class, 713

cellSelectionEnabled property	childCount property
JTable class, 681, 682	DefaultMutableTreeNode interface, 663
changedUpdate() method	children() method
DocumentListener interface, 558	TreeNode class, 664
ChangeListener, 420	choosableFileFilters property
AbstractButton class, 102	JFileChooser class, 327
adding to JSlider component, 284	chooserPanels property
attaching to Style interface, 606	JColorChooser class, 307, 320
handling JCheckBox selection events	choosers
131, 133	JColorChooser class
handling JProgressBar events, 445, 446	creating, 301
handling JRadioButton selection events,	customizing look and feel, 320–322
142, 145	introduction, 300–301
handling JScrollBar events, 424, 425	properties, 307–320
handling JSlider events, 430	using, 302–307
handling JToggleButton selection	JFileChooser class
events, 121	creating, 323
listening to JMenu events, 173	customizing look and feel, 336–341
listening to JMenuItem events, 165	introduction, 322
ChangeListener interface	properties, 326–327
listening for JSpinner class events,	using, 323–326
511–512	working with file filters, 328–336
changeListener property	className property
JSpinner class, 510	UIManager.LookAndFeelInfo class, 749
changeListeners property	clearSelection() method
AbstractButton class, 98	JList class, 479
JProgressBar component, 440	clickCountToStart property
JSlider component, 431	DefaultCellEditor class, 647
JTabbedPane class, 399	clipboard access operations
JViewport class, 412	JTextComponent class, 526
changeUpdate() method	operations with JTextField class,
DocumentListener interface, 546	534–537
characterAttributes property	closable property
JTextPane class, 580	JInternalFrame class, 254
CharacterConstants class	closed property
keys for attributes, 598	JInternalFrame class, 254, 255
check box node editor	closedIcon property
creating CheckBoxNode class, 650–651	DefaultTreeCellRenderer class, 635
creating CheckBoxNodeEditor class,	coalesce property
653-658	Timer class, 36
creating CheckBoxNodeRenderer class,	color category of properties
651–653	JTextComponent class, 524
creating test program, 658–659	Color class
introduction, 650	decode() method, 499
CheckBoxUI class	displaying list of colors from, 311
user interface delegate, 126	dragging-and-dropping, 730
checkIcon property	color property
JCheckBoxMenuItem component, 188	JColorChooser class, 307, 308
, checkboarienancin component, 100	, 20101 01100001 01000, 001, 000

interface, 460

ColorChooserComponentFactory class	introduction, 460
301, 308	storing labels and colors arrays, 314
getPreviewPanel() method, 320	ComboBoxUI example, 765–766
panels provided to JColorChooser	Command design pattern
class, 310	Concrete Command, 799
using, 320	participants, 788
ColorChooserUI class, 320	commitEdit() method
bug in implementation class, 309	JFormattedTextField component, 612
ColorConstants class	component anchoring
keys for attributes, 598	GridBagConstraints class, 354
colorModel property	Component class
JComponent class, 78	background property, 682
ColorSelectionModel interface	compared to JComponent class, 67
changing color chooser, 313	foreground property, 682
color changes, 313	methods
data model for JColorChooser, 303	getComponentOrientation() method
DefaultColorSelectionModel class	345
implements, 301	getListeners() method, 29
column property	getName() method, 397
TableModelEvent class, 700	setFocusable() method, 49
columnCount property	setFocusTraversalKeys() method, 55
DefaultTableColumnModel class, 709	shortcut API methods, 55
DefaultTableModel class, 697	component property
JTable class, 681	DefaultCellEditor class, 647
columnHeader property	JMenu class, 171
JScrollPane class, 407	JMenuBar class, 159
columnHeaderView property	JMenuItem class, 164
JScrollPane class, 407, 409	JPopupMenu class, 179
columnIdentifiers property	JToolTip class, 85
DefaultTableModel class, 698	component resizing
columnMargin property	GridBagConstraints class, 354
DefaultTableColumnModel class, 709	componentCount property
columnModel property	JComponent class, 78
JTable class, 681	ComponentListener interface
JTableHeader class, 716	supported by JFrame class, 245
columnModelListeners property	componentOrientation property
DefaultTableColumnModel class, 709	JComponent class, 78
columns property	JScrollPane class, 407
DefaultTableColumnModel class, 709	JTextComponent class, 523
JTextArea class, 571	componentPopupMenu property
JTextField class, 571  JTextField class, 529	JComponent class, 79
columnSelectionAllowed property	components property
DefaultTableColumnModel class, 709	JComponent class, 78
JTable class, 681, 682	ComponentUI class
ComboBoxEditor interface	UI delegates a subclass of, 741
editing JComboBox class elements, 499	CompoundBorder class, 226
entering choices for JComboBox class, 491	configuring properties, 227
ComboBoxModel interface, 64, 451 extended by MutableComboBoxModel	creating, 226

CompoundEdit class, 783 controlShadow property inProgress property, 791 MetalLookAndFeel class, 772 methods, 791 controlTextColor property Concrete Command MetalLookAndFeel class, 772 Command design pattern, 799 controlTextFont property configureEnclosingScrollPane() method MetalLookAndFeel class, 772 JTable class, 680 conversion operations Constraints class, 371 JTextComponent class, 526 convertValueToText() method Container class add() method, 157, 381, 397 ITree class, 642 compared to JComponent class, 67 copy() method setLayout() method, 344 JTextComponent class, 534 transferFocusDownCycle() method, 55 copyAction class constant ContainerListener interface DefaultEditorKit class, 592 supported by JFrame class, 245 copyInto() method ContainerOrderFocusTraversalPolicy DefaultListModel class, 460 createBevelBorder() method class, 53 contains() method BevelBorder class, 221 DefaultListModel class, 460 createBlackLineBorder() method JToolTip class, 85 LineBorder class, 219 contentAreaFilled property CreateColorSamplePopup program AbstractButton class, 98 modified version, 318-320 contentPane property createCompoundBorder() method JDialog class, 250 CompoundBorder class, 226 JFrame class, 243 createDefaultColumnsFromModel() method IInternalFrame class, 254 ITable class, 708 JRootPane class, 237 createDefaultDivider() method BasicSplitPaneUI subclass, 389 IWindow class, 248 CONTENTS\_CHANGED type constant createDialog() method ListDataEvent class, 455 JColorChooser class, 305 contentType property JOptionPane class, 272, 276, 292 createDisabledImage() method JEditorPane class, 575 CONTIGUOUS\_TREE\_SELECTION mode GrayFilter class, 97 TreeSelectionModel interface, 669 createEtchedBorder() method continuousLayout property EtchedBorder class, 224 JSplitPane class, 384, 385, 391 createGlue() method control property Box class, 380, 382 MetalLookAndFeel class, 772 createGrayLineBorder() method controlButtonsAreShown property LineBorder class, 220 JFileChooser class, 327 createHorizontalBox() method controlDarkShadow property Box class, 378 MetalLookAndFeel class, 772 createInternalFrame() method controlDisabled property JOptionPane class, 272, 276 MetalLookAndFeel class, 772 createLineBorder() method LineBorder class, 220 controlHighlight property createLoweredBevelBorder() method MetalLookAndFeel class, 772 controlInfo property BevelBorder class, 221 MetalLookAndFeel class, 772 createMatteBorder() method MatteBorder class, 226

	J_4 J_1 J:C:4: 4l J_
createRadioButtonGrouping() method	data model modification methods
JRadioButton class, 139	DefaultComboBoxModel class, 461
RadioButtonUtils class, 137, 140, 141	dataVector property
createRaisedBevelBorder() method	DefaultTableModel class, 698
BevelBorder class, 222	Date object
createRigidArea() method	providing to JFormattedTextField
Box class, 382	constructor, 612
createRootPane() method	date property
JApplet class, 252	SpinnerDateModel class, 515
JDialog class, 250, 252	DateEditor class
JFrame class, 246	introduction, 519
JWindow class, 248	properties, 519
createStandardLabels() method	DateFormat class, 612
Hashtable class, 435	DateFormatter class, 566
createTitledBorder() method	debugGraphicsOption property
TitledBorder class, 229	JComponent class, 78
createToolTip() method	DecimalFormat class
JToolTip class, 84	associated with NumberEditor class, 520
createTransferable() method	decode() method
TransferHandler class, 734, 735	Color class, 499
createValue() method	Decorator pattern
LazyValue interface, 755	sorting JTable elements, 700
createVerticalBox() method	DefaultBoundedRangeModel class
Box class, 378	getListeners() method, 421
crossPlatformLookAndFeelClassName	implementing BoundedRangeModel
Dronerty	interface, 420
property IIIManager class, 748	interface, 420 defaultButton property
UIManager class, 748	defaultButton property
UIManager class, 748 current() method	defaultButton property JButton class, 105

UIManager class, 748 current() method ElementIterator class, 611 currentDirectory property JFileChooser class, 327 currentManager() method JComponent class, 70 currentTheme property MetalLookAndFeel class, 774 cursor property JComponent class, 79 cursorSet property JComponent class, 79 cut() method JTextComponent class, 534 cutAction class constant DefaultEditorKit class, 592 cutAction() method DefaultEditorKit class, 535	defaultButton property JButton class, 105 JRootPane class, 237 DefaultButtonModel class, 98 AbstractButton class, 99 properties, 100 ToggleButtonModel class customizes behavior of, 115 defaultCapable property JButton class, 105 DefaultCaret class, 547 DefaultCellEditor class, 644, 676, 719 as cell editor with JTable, 624 combining with DefaultTreeCellEditor class, 648 creating, 645, 646 editing table cells, 718 editing tree nodes, 645 implementation of TreeCellEditor class, 623 properties, 647
UIManager class, 748 current() method     ElementIterator class, 611 currentDirectory property     JFileChooser class, 327 currentManager() method     JComponent class, 70 currentTheme property     MetalLookAndFeel class, 774 cursor property     JComponent class, 79 cursorSet property     JComponent class, 79 cut() method     JTextComponent class, 534 cutAction class constant     DefaultEditorKit class, 592 cutAction() method     DefaultEditorKit class, 535	defaultButton property JButton class, 105 JRootPane class, 237 DefaultButtonModel class, 98 AbstractButton class, 99 properties, 100 ToggleButtonModel class customizes behavior of, 115 defaultCapable property JButton class, 105 DefaultCaret class, 547 DefaultCellEditor class, 644, 676, 719 as cell editor with JTable, 624 combining with DefaultTreeCellEditor class, 648 creating, 645, 646 editing table cells, 718 editing tree nodes, 645 implementation of TreeCellEditor class, 623

defaultClosedIcon property	DefaultMetalTheme class
DefaultTreeCellRenderer class, 635	introduction, 774
defaultCloseOperation property	DefaultMutableTreeNode class, 624
JDialog class, 250	building hierarchies, 661, 662
JFrame class, 243, 246	creating, 661
JInternalFrame class, 254, 255	DynamicUtilTreeNode as subclass of, 666
DefaultColorSelectionModel class	properties, 663
javax.swing.colorchooser package, 301	traversing trees, 664
DefaultComboBoxModel class	userObject property, 640, 666
implements ComboBoxModel	working with tree nodes, 661–664
interface, 451	DefaultMutableTreeNode interface
introduction, 460-463	querying node relationships, 664
DefaultDesktopManager class, 252	defaultOpenIcon property
implementation of DesktopManager	DefaultTreeCellRenderer class, 635
interface, 266	defaultRootElement property
DefaultEditor class	AbstractDocument class, 540
properties, 518	DefaultStyledDocument class, 596
DefaultEditorKit class	defaults property
class constants, 591	LookAndFeel class, 742
copyAction class constant, 592	UIManager class, 748
cutAction class constant, 592	DefaultSingleSelectionModel class, 395
cutAction() method, 535	default implementation of
pasteAction class constant, 592	SingleSelectionModel interface, 162
readOnlyAction class constant, 592	DefaultStyledDocument class, 521, 574, 595
writableAction class constant, 592	creating, 596
DefaultFocusManager class, 47	implementation of StyledDocument
DefaultFocusTraversalPolicy	interface, 596
FocusTraversalPolicy class, 53	properties, 596
DefaultFormatterFactory class	DefaultTableCellRenderer class, 686, 687
javax.swing.text package, 620, 621	DefaultTableColumnModel class
DefaultHighlighter class, 547	implementation of TableColumnModel
DefaultHighlighter.HighlightPainter class, 547	interface, 676
DefaultKeyboardFocusManager class, 37, 55	properties, 708
defaultLeafIcon property	used when TableColumnModel interface
DefaultTreeCellRenderer class, 635	is not specified, 678
DefaultListCellRenderer class, 468	DefaultTableModel class
and ListCellRenderer interface, 468, 470	creating, 696, 697
DefaultListModel class	creating sparse table model, 698, 699
data model implementation of JList, 451	encapsulates TableModel interface, 676
introduction, 453	filling, 697
methods, 459	introduction, 696
DefaultListSelectionModel class	
	listening to JTable events with TableModelListener, 699
properties, 475, 683	
defaultLookAndFeelDecorated property	properties, 697
JDialog class, 250	DefaultTreeCellEditor class, 644
JFrame class, 244	combining with DefaultCellEditor class, 648
DefaultMenuLayout class	implementation of TreeCellEditor class, 623
javax.swing.plaf.basic package, 381	introduction, 647
	using for a JTextField editor with JTree, 645

DefaultTreeCellRenderer class	Dictionary class, 435
configuring, 651	java.util package, 641
creating custom renderer, 637–641	die() method
implementation of TreeCellRenderer	UndoableEdit interface, 790
interface, 623	directorySelectionEnabled property
introduction, 635	JFileChooser class, 327, 331
properties, 635, 636	disabledIcon property
DefaultTreeModel class	AbstractButton class, 98, 102
introduction, 667, 668	JLabel class, 89
storing TreeModel for JTree, 624	disabledSelectedIcon property
working with tree nodes, 659	AbstractButton class, 98, 102
DefaultTreeSelectionModel class	disabledTextColor property
implementation of TreeSelectionModel, 624	JTextComponent class, 523
introduction, 670	discardAllEdits() method
delay property	UndoManager class, 793
JMenu class, 171	DISCONTIGUOUS_TREE_SELECTION mode
Timer class, 36	TreeSelectionModel interface, 669
delegation-based event handling, 17	dismissDelay property
event delegation model, 17, 18	ToolTipManager class, 87
event listeners as observers, 19	displayable property
creating listener instance, 20	JComponent class, 79
defining the listener, 19	displayedMnemonic property
registering listener with component, 20	JLabel class, 89, 91
sequence diagram, 18	displayedMnemonicIndex property
depth property	AbstractButton class, 98, 101
DefaultMutableTreeNode interface, 663	JLabel class, 89, 91
depthFirstEnumeration() method	dividerLocation property
DefaultMutableTreeNode class, 665	JSplitPane class, 385, 387, 388
description property	dividerSize property
ImageIcon class, 96	JSplitPane class, 385
LookAndFeel class, 742	Document interface, 788
desktopColor property	AbstractDocument class provides basic
MetalLookAndFeel class, 773	implementation, 540
desktopIcon property	binding commands to, 788
JInternalFrame class, 254	displaying contents with EditorKit class, 607
DesktopManager interface, 262, 265	extended by StyledDocument interface, 595
management of frames within desktop, 252	filtering document models, 542-546
desktopManager property	implementations, 521
JDesktopPane component, 263	AbstractDocument class, 60
desktopPane property	insertString() method, 583
JInternalFrame class, 254	introduction, 537–540
dialogInit() method	PlainDocument implementation, 526, 570
JDialog class, 252	specifying Document data model for
dialogTitle property	JPasswordField class, 564
JFileChooser class, 327	document property
dialogType property	JFormattedTextField class, 567
JFileChooser class, 327	JTextComponent class, 523
DiamondAbstractButtonStateIcon icon	JTextField class, 529, 530
using with component that is not	JTextPane class, 580
AbstractButton type, 189	
<b>3.1</b> ·	

DocumentEvent interface dropTarget property introduction, 546 JComponent class, 79 DocumentEvent.ElementChange class, 547 dump-model action, 591 DocumentEvent.EventType class DynamicUtilTreeNode class constants, 546 inner class of JTree, 624, 666 DocumentFilter class E attaching to AbstractDocument, 538 echoChar property customizing, 542-545 JPasswordField class, 564 filtering document models, 542 echoCharIsSet() method methods, 542 JPasswordField class, 564 documentFilter property edit property AbstractDocument class, 540 UndoableEditEvent class, 794 DocumentListener interface editable property attaching to data model, 538 JComboBox class, 492 introduction, 546 JTextComponent class, 523 listening to JTextField events, 558, 559 JTree class, 628, 643 documentListeners property editing property AbstractDocument class, 540 ITable class, 681 documentProperties property JTree class, 628 AbstractDocument class, 540 editingCanceled() method dot property CellEditorListener interface, 650 Caret interface, 548 editingColumn property doubleBuffered property JTable class, 681 JComponent class, 70, 78 editingPath property doubleBufferingEnabled property JTree class, 628 RepaintManager class, 71 editingRow property doubleBufferMaximumSize property JTable class, 681 RepaintManager class, 71 editingStopped() method downFocusCycle() method CellEditorListener interface, 650 KeyboardFocusManager class, 55 editor property drag-and-drop support, 729 JComboBox class, 492 built-in drag-and-drop support, 729-731 JSpinner class, 510 support for images, 733 editorComponent property TransferHandler class, 731-733 JTable class, 681 dragEnabled property EditorContainer class JColorChooser class, 307 placing custom editors within, 623 JFileChooser class, 327 EditorKit class IList class, 464 capabilities of TextAction objects, 607 JTable class, 681 editorKit property JTextComponent class, 523 JEditorPane class, 575 JTree class, 628 JTextPane class, 580 draggable image editValid property implementing, 736–740 JFormattedTextField class, 567 draggedColumn property Element interface JTableHeader class, 716 and Document interface, 538 draggedDistance property elementAt() method JTableHeader class, 716 DefaultListModel class, 459 dragMode property ElementChange class, 547 JDesktopPane component, 263

ElementIterator class	EventListenerList class, 29
introduction, 611	managing listener lists, 32, 33, 34
elements() method	EventQueue class

date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic() method, 527
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField.	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528 JLayered Pane class
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField.	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528 JLayered Pane class adding components in layers, 240–241
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528 JLayered Pane class
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class manages use of formatter objects, 617 JFrame class adding components, 245	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic() method, 527 set Label For() method, 528 JLayered Pane class adding components in layers, 240–241 as component of JRoot Pane class, 235 component layers and positions, 241
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class manages use of formatter objects, 617 JFrame class adding components, 245 BorderLayout class as default layout	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528  JLayered Pane class adding components in layers, 240–241 as component of JRoot Pane class, 235 component layers and positions, 241 creating, 240
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class manages use of formatter objects, 617 JFrame class adding components, 245	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic() method, 527 set Label For() method, 528 JLayered Pane class adding components in layers, 240–241 as component of JRoot Pane class, 235 component layers and positions, 241
date and time formats, 612–614 example, 567–569 finding actions, 591 formats, 612 input masks, 618–620 introduction, 566 properties, 567 notify-field-accept action, 587 number formats, 615–617 setMask() method, 618 setText() method, 615 setValue() method, 615 using formatted input options and validation available, 585 working with editors based on, 518 JFormattedTextField. AbstractFormatterFactory class manages use of formatter objects, 617 JFrame class adding components, 245 BorderLayout class as default layout	JIT compilers, 1 JLabel class, 67 Accessible JLabel class, 806 creating, 89 customizing look and feel, 92 UIResource value settings, 92 Default List Cell Renderer class as subclass of, 468 dragging text from, 732 event handling, 91 implementation of within Table Cell Renderer interface, 676 introduction, 88 properties, 89 set Displayed Mnemonic () method, 527 set Label For () method, 528  JLayered Pane class adding components in layers, 240–241 as component of JRoot Pane class, 235 component layers and positions, 241 creating, 240

JList class	JInternalFrame class, 254
adding element level tooltips, 488–490	JRootPane class, 237
creating components, 463–464	JMenuItem class
creating dual list box, 481–488	creating, 162–163
customizing look and feel, 480	customizing look and feel, 167
UIResource-related properties, 480-481	UIResource-related properties, 167–168
data model implementation, 451	handling events, 164–167
displaying multiple columns, 479–480	introduction, 162
introduction, 463	properties, 163
properties, 464–465	setText() method, 589
rendering elements, 468–470	JOptionPane class, 9
creating complex ListCellRenderer,	adding components to button area, 285
471–473	adding components to message area, 284
scrolling components, 466–468	automatically creating in pop-up window,
scrolling support, 406	274–275
selecting elements, 473-479	arguments for factory methods, 276
sharing data model with JComboBox	confirm pop-ups, 278
506, 508	input pop-ups, 278–279
JMenu class	message pop-ups, 277
adding menu items to, 169	option pop-ups, 280
addSeparator() method, 175	createDialog() method, 292
creating, 168–169	creating, 268–269
customizing look and feel, 173	creating JDialog class, 249
UIResource-related properties, 173–175	creating pop-up dialogs hosted by
insertSeparator() method, 175	JInternalFrame class, 254
introduction, 168	customizing look and feel, 287–291
listening to events	displaying, 271–274
with ChangeListener, 173	displaying multiline messages, 281–282
with MenuListener, 173	initialValue argument, 271
properties, 171	introduction, 267–268
setting menu components, 172	listening for property changes, 286
using Action objects, 170, 171	message argument, 269–270
JMenuBar class	message property, 283
adding Action objects, 589	messageType argument, 270
adding glue component to, 381	options argument, 271
adding to or removing menus from menu	optionType argument, 270
bars, 157–158	properties, 280–281
and JApplet class, 252	showInternalMessageDialog()
changing layout manager, 161	method, 277
contained in JLayeredPane class, 236	showMessageDialog() method, 277
creating, 157	JPanel class, 67
customizing look and feel, 159	AbstractColorChooserPanel as JPanel
UIResource-related properties, 160	subclass, 312
introduction, 157	creating, 110
properties, 158–159	customizing look and feel, 112
setHelpMenu() method, 381	UIResource-related properties, 112
jMenuBar property	FlowLayout class as default layout
JDialog class, 250	manager for, 345
JFrame class, 243	implementing Accessible interface, 807

	1' 4' - 4 - 4' - 500
mixing lightweight and heavyweight	listing text actions, 586
components, 179	placing within JPanel, 227
placing JRadioButton objects within, 227	properties, 136
setting previewPanel property to empty	JRadioButtonMenuItem component, 8
JPanel, 308	configuring properties, 191
using, 110–112	creating, 190
JPasswordField class, 5	customizing look and feel, 191
built-in drag-and-drop support, 730	UIResource-related properties, 191–192
creating, 563–564	example, 192–194
customizing look and feel, 565	handling selection events, 190
UIResource-related properties, 565	introduction, 184, 189
finding actions, 591	JRootPane class
introduction, 563	and JDialog class, 248
notify-field-accept action, 587	creating, 236
properties, 564	creating JLayeredPane class, 240
subclass of JTextField class, 521	customizing look and feel, 238–239
JPopupMenu class	introduction, 235
adding menu item to JMenu, 170	layering effect, 180
adding menu items to, 177	properties, 236–238
creating, 176	RootLayout inner class, 343
customizing look and feel, 180	windowDecorationStyle property, 244
UIResource-related properties, 181	JScrollBar component
displaying, 178	BoundedRangeModel interface
example, 182–184	properties, 419
introduction, 176	compared to JSlider component, 6
JMenu contained within, 168	creating, 422
properties, 179	customizing look and feel, 427
Separator class, 182	UIResource-related properties, 427–428
watching for pop-up menu visibility, 180	handling scrolling events, 423
JProgressBar component, 6	introduction, 421
creating, 439–440	listening to scrolling events
customizing look and feel, 446	with AdjustmentListener, 423
UIResource-related properties, 446	with ChangeListener, 424–425
handling events, 445–446	methods, 426
introduction, 439	properties, 14, 426
labeling, 441	JScrollPane class
painting borders, 441	creating, 404–405
process of step through, 442-445	creating columns that don't scroll, 692
properties, 440	creating viewport view, 406
using an indeterminate progress bar, 442	customizing look and feel, 410
JRadioButton class	UIResource-related properties, 410
compared to JRadioButtonMenuItem	introduction, 403
component, 189	JScrollBar component used within, 421
creating, 135–136	JTextComponent text components can be
customizing look and feel, 147	placed within, 523
UIResource-related properties, 148	JViewport class used with, 371
grouping in a ButtonGroup, 136–139	manually positioning JTable view, 679
handling selection events, 139–145	placing JList component within, 466
introduction, 134	placing JTableHeader objects within, 715

placing JTextArea within, 570	properties, 510–511
placing JTree within, 627	SpinnerModel interface as data model, 513
placing tree within, 623	JSplitPane class, 10
policies, 405	changing components, 386
properties, 407	creating, 384
resetting viewport position, 410	customizing look and feel, 393
Scrollable interface, 406	UIResource-related properties, 393
use of ScrollPaneLayout class, 370	introduction, 383
using with JTable class, 678	listening for property changes, 390–392
working with headers and corners, 409	moving divider, 387
working with ScrollPaneLayout	one-touch expandable divider, 388
manager, 408	properties, 385
JScrollPane.ScrollBar. See Scrollable	resizing, 389
interface	resizing components, 388
JSeparator class, 8	setting orientation, 386
creating, 175	JTabbedPane class, 10
customizing look and feel, 176	adding and removing tabs, 397–398
UIResource-related properties, 176	addTab() method, 398
does not implement MenuElement	creating, 395–396
interface, 195	customizing look and feel, 401
introduction, 175	UIResource-related properties, 402–403
properties, 175	displaying multiple chooser panels in
setOrientation() method, 182, 208	JColorChooser, 301
JSlider class, 6	introduction, 394
adding to JOptionPane, 284	listening for changing tab selection,
client properties, 438	399–401
creating, 428–429	properties, 398–399
customizing look and feel, 435–438	used instead of CardLayout class, 357
displaying tick marks within, 432	JTable class, 7, 677
handling events, 430	autoCreateColumnsFromModel
introduction, 428	property, 708
labeling positions, 434	auto-resize modes, 683–685
methods, 431	createDefaultColumnsFromModel()
properties, 431	method, 708
snapping thumb into position, 434	creating, 677–678
UIResource-related properties, 437	customizing look and feel, 689
JSpinner class, 6	UIResource-related properties, 689–690
creating, 510	display settings, 682
custom models, 517	editing table cells, 718
customizing look and feel, 512	example, 675
UIResource properties, 512–513	handling events, 689
editors, 518	listening to events with
DateEditor class, 519	TableColumnModelListener, 709–712
DefaultEditor class, 518	listing properties within with UIDefaults
ListEditor class, 519	class, 749
NumberEditor class, 520	manually positioning view, 679
introduction, 509	preinstalled renderers, 695
listening for events with ChangeListener	print() method, 724, 727
interface, 511–512	properties, 680, 682
	1 1 ' '

removing column headers, 680	JTextField class, 499
rendering table cells, 686–689	as editor for JTree, 645
scrolling components, 678–679	as subclass of JTextComponent class, 521
scrolling support, 406	BoundedRangeModel interface, 447, 449
selection modes, 682, 683	built-in drag-and-drop support, 730
sorting elements, 700–707	creating, 527
support classes, 675	customizing look and feel, 562–563
JTableHeader class, 676	dragging text from JLabel class to
creating, 716	JTextField class, 733
customizing look and feel, 717	editing JComboBox class elements, 498
introduction, 715	editing table cells, 718
properties, 716	handling events, 556–562
using tooltips in headers, 716, 717	introduction, 526
JTextArea class	JPasswordField as subclass of, 521, 565
adding to window, 476	JTextComponent operations, 530
as subclass of JTextComponent class, 521	accessing the clipboard, 534–537
as view part of MVC, 59	loading and saving content, 530–534
built-in drag-and-drop support, 730	notify-field-accept action, 587
creating, 570	properties, 529
customizing look and feel, 572	using JLabel mnemonics, 527–529
UIResource-related properties, 573–574	JTextPane class, 5
handling events, 572	as subclass of JEditorPane component, 521
introduction, 570	built-in drag-and-drop support, 730
model and UI delegate, 60	creating, 580
properties, 571, 572	creating stylized text for display, 585
supporting undoable operations, 784	customizing look and feel, 581
JTextComponent class	DefaultStyledDocument class as data
associating CaretListener interface	model, 596
with, 550	Hello, Java example, 600–601
associating NavigationFilter class with, 552	introduction, 580
drawing in the background of component,	loading with content, 582–583
525–526	populating StyledDocument for, 599
getActions() method, 586	properties, 580–581
getKeymap() method, 586	JToggleButton class, 6
introduction, 523	creating, 119–120
modelToView() method, 549	customizing look and feel, 124
operations, 526	UIResource elements, 125
operations with JTextField class, 530–537	handling selection events, 121–124
properties, 523	introduction, 119
read() method, 607	properties, 120
registerKeyboardAction() method, 554	ToggleButtonModel class as inner class
scrolling support, 406	of, 115
setKeymap() method, 586	JToggleButtonMenuItem example, 195–199
subclasses, 521	JToolBar class, 8, 784
write() method, 607	adding components to, 202
JTextComponent.KeyBinding class, 556	creating, 202
	customizing look and feel, 205
	getUIClassID() method, 763

handling events, 205	K
introduction, 202	KeyBinding class, 556
properties, 203	KeyboardFocusManager class, 37, 48
Separator class, 208	activeWindow property, 55
usage example, 206–208	focus management, 47
JToolTip class, 7	focusedWindow property, 55
creating, 84	focusOwner property, 55
creating customized objects, 84	input focus behavior of Swing
customizing look and feel, 86	components, 55
displaying positional tooltip text, 85	methods, 55
properties, 85	KeyEvent class
JTree class, 7	getKeyText() method, 29
convertValueToText() method, 642	java.awt.event package, 163
creating a proper ComboBox editor for, 648	KeyListener class
creating, 624–627	listening to JTextField events, 557
creating custom renderer, 637–641	sending keystrokes to ActionListener, 30
customizing look and feel, 630–634	supported by JFrame class, 246
DefaultTreeCellEditor class, 647	using, 586
DefaultTreeCenEditor class, 647 DefaultTreeModel class, 667	Keymap interface, 37
DynamicUtilTreeNode inner class, 624, 666	
editable property, 643	addActionForKeyStroke() method, 45
·	implementation as a wrapper to
EmptySelectionModel inner class, 624,	InputMap/ActionMap
669	combination, 586
introducing trees, 623–624	introduction, 554–556
properties, 628–630	maps KeyStroke to TextAction, 586
scrolling support, 406	keymap property
scrolling trees, 627–628	JTextComponent class, 523, 554
should use DefaultTreeCellEditor for	keys property
JTextField editor, 645	AbstractAction class, 41
working with tree tooltips, 641–643	KeySelectionManager interface, 195, 493
JViewport class	keystroke manager for JComboBox
contained within JScrollPane, 403	class, 491
creating, 412	listening to JComboBox keyboard
customizing look and feel, 417	events, 494
introduction, 412	keySelectionManager property
keyboard movement control, 414–417	JComboBox class, 492, 494
properties, 412	KeyStroke class
scroll modes, 414	creating, 42
use of ViewportLayout class, 371	getKeyStroke() method, 43
usually used with JScrollPane class, 371	getKeyStrokeForEvent() method, 43
JWindow class	keystroke registration conditions, 42
BorderLayout class as default layout	registering, 43, 44, 45
manager for, 347	registering to JTextComponent class, 554
creating, 247	Swing-specific event handling, 37
extending, 248	using, 586
fitting JPopupMenu menu items, 179	KeyTextComponent class
handling events, 248	registering ActionListener, 31
introduction, 247	
properties, 248	

III.	CardLayout class, 357
label property	FlowLayout class, 345–347
AbstractButton class, 99	GridBagConstraints class, 353–357
JPopupMenu class, 179	GridBagLayout class, 350–353
labelFor property	GridLayout class, 349–350
JLabel class, 90, 91	introduction, 343
labelTable property	LayoutManager interface, 344–345
JSlider component, 431	OverlayLayout class, 365–370
largeModel property	responsibilities, 343–344
JTree class, 628, 630	ScrollPaneLayout class, 370
lastChild property	SizeRequirements class, 370
DefaultMutableTreeNode interface, 663	SpringLayout class, 371–375
lastDividerLocation property	ViewportLayout class, 371
JSplitPane class, 385, 389, 390, 392	layout property
lastIndex property	AbstractButton class, 98
ListSelectionEvent class, 476	Box class, 379
lastIndexOf() method	JComponent class, 78
DefaultListModel class, 460	JDialog class, 250
lastLeaf property	JFrame class, 243
DefaultMutableTreeNode interface, 663	JInternalFrame class, 255
lastPathComponent property	JLayeredPane class, 240
TreePath class, 671	JScrollPane class, 407
lastRow property	JToolBar class, 203
TableModelEvent class, 700	JWindow class, 248
lastSelectedPathComponent property	LayoutFocusTraversalPolicy class
JTree class, 628, 630	focus management, 47
lastVisibleIndex property	FocusTraversalPolicy class, 53
JList class, 465, 468	LayoutManager interface
layer property	introduction, 344
JInternalFrame class, 254	methods, 344
LayeredHighlighter class, 547	LayoutManager2 interface
LayeredHighlighter.LayerPainter class, 547	methods, 345
layeredPane property	layoutOrientation property
JDialog class, 250	JList class, 465
JFrame class, 243	lazy, definition, 755
JInternalFrame class, 254	LazyValue interface, 755
•	creating, 755
JRootPane class, 237	createValue() method, 755
JWindow class, 248	leadAnchorNotificationEnabled property
LayerPainter class, 547	
layout management	DefaultListSelectionModel class, 475, 683
changing manager for JMenuBar class, 161	leader property
changing manager for JTabbedPane	TabStop class, 604
class, 399	leadSelectionIndex property
Swing components, 10, 11	DefaultListSelectionModel class, 475, 683
layout managers	JList class, 465
See also AWT layout managers and Swing	leadSelectionPath property
layout managers	DefaultTreeSelectionModel class, 670
BorderLayout class, 347–349	JTree class, 628, 630
BoxLayout class, 357–364	

leadSelectionRow property	ListDataListener class, 451
DefaultTreeSelectionModel class, 670	list managed by DefaultListModel class, 453
JTree class, 629–630	list management provided by
leaf nodes	AbstractListModel, 452
creating editor for, 648–649	listening for ListModel events, 454–460
leaf property	listening to JComboBox events, 497
DefaultMutableTreeNode interface, 663	managed by ListModel interface, 452
leafCount property	using, 455
DefaultMutableTreeNode interface, 663	ListEditor class
leafIcon property	introduction, 519
DefaultTreeCellRenderer class, 635	ListModel interface
leftComponent property	converting ArrayList data structure, 453
JSplitPane class, 385–386	data model for JList class, 463
length property	defines data model for JComboBox
AbstractDocument class, 540	class, 491
level property	extended by
DefaultMutableTreeNode interface, 663	ComboBoxModel interface, 460
lightweight property	introduction, 451
JComponent class, 79	management of ListDataListener, 452
lightWeightPopupEnabled property	partially implemented by
JComboBox class, 492	AbstractListModel, 452
JPopupMenu class, 179	ListSelectionEvent class
ToolTipManager class, 87	properties, 476
LineBorder class	ListSelectionListener interface
configuring properties, 220	listening to JList events, 476–478
creating, 219	registering with ListSelectionModel
lineColor property	class, 683
LineBorder class, 220	listSelectionListeners property
lineCount property	DefaultListSelectionModel class, 475, 683
JTextArea class, 571	JList class, 465
lineWrap property	ListSelectionModel interface, 676
JTextArea class, 571	allowing users to select columns and rows
list model controls, 451	from table, 708
See also individual controls	attaching ListSelectionListener, 476
list property	constants for different selection
SpinnerListModel class, 516	modes, 683
ListCellRenderer interface, 719	controls selection process for JList, 473
and DefaultListCellRenderer class, 468, 470	creating columns that do not scroll, 692
cell renderer for JComboBox class, 491	default implementation is
creating complex version, 471–473	DefaultListSelectionModel class, 475
drawing elements of JList class, 463	handling JTable events, 689
getListCellRendererComponent()	model for selecting elements of JList
method, 469	class, 463
making lazy, 755	
<u> </u>	modes, 474
listData property	multiple-selection mode, 678
JList class, 465	registering ListSelectionListener, 683
ListDataEvent class	settings control selection within table, 676
properties, 454	load() method
	SynthLookAndFeel class, 780

locale property	makeIcon() method
AccessibleContext class, 807	LookAndFeel class, 755
JComponent class, 79	Map interface, 41
localization	margin property

JScrollBar component, 426	Caret interface, 549
JSlider component, 431	NavigationFilter class, 552
JSpinner class, 510	moveToBack() method
JTabbedPane class, 399	JLayeredPane class, 241
JTable class, 681	moveToFront() method
JTree class, 629	JLayeredPane class, 241
ListEditor class, 520	multiClickThreshhold property
NumberEditor class, 520	AbstractButton class, 99
modelIndex property	multiline messages
TableColumn class, 713	displaying in JOptionPane, 281, 282
modelToView() method	MULTIPLE_INTERVAL_SELECTION mode
JTextComponent class, 549	ListSelectionModel interface, 474
ModifyModelSample program	multiSelectionEnabled property
using DefaultListModel class modifying	JFileChooser class, 327
methods, 455–459	multithreaded Swing event handling, 21, 23
mostRecentFocusOwner property	managing listener lists, 29
JInternalFrame class, 255	AWTEventMulticaster class, 29–32
MotifButtonUI class	EventListenerList, 32–34
	selectable button example, 22
getBorderInsets() method, 217 MotificackAndFool implementation	•
MotifLookAndFeel implementation	Timer class, 34–36
LookAndFeel.supportedLookAndFeel, 742	using PropertyChangeListeners as
mouseClicked() method	Observers, 26–28
MouseInputListener interface, 23	using SwingUtilities class for mouse
mouseDragged() method	button identification, 23–26
MouseMotionListener interface, 23	MutableAttributeSet interface, 585, 595
mouseEntered() method	adding name to with Style interface, 606
MouseInputListener interface, 23	introduction, 597
MouseEnterFocusMover class	modifying with StyleConstants class,
programmatically moving focus, 49	602–603
mouseExited() method	setting JTextPane text attributes, 580
MouseInputListener interface, 23	MutableComboBoxModel interface, 64, 451
MouseInputListener interface	implementing DefaultComboBoxModel
methods, 23	class, 461
MouseListener interface	introduction, 460
creating to handle input focus, 48	MutableTreeNode interface, 659
requestFocusInWindow() method, 48	insert() method, 662
supported by JFrame class, 246	nodes of JTree are implementations of, 624
MouseMotionListener interface	working with tree nodes, 660
methods, 23	MVC architecture, 11, 59
supported by JFrame class, 246	BoundedRangeModel interface, 419
mouseMoved() method	flow described
MouseMotionListener interface, 23	communication, 59
mousePosition property	UI delegates for Swing components, 60
JComponent class, 79	handling JScrollBar events, 423
mousePressed() method	predefined data models, 63–64
MouseInputListener interface, 23	sharing data models, 61–63
mouseReleased() method	

 $Mouse Input Listener\ interface,\ 23$ 

N	Number object
name property	providing to JFormattedTextField
JComponent class, 79	constructor, 612
LookAndFeel class, 742	number property
MetalLookAndFeel class, 773	SpinnerNumberModel class, 517
UIManager.LookAndFeelInfo class, 749	NumberEditor class
NamedStyle class, 595, 606	introduction, 520
nativeLookAndFeel property	properties, 520
LookAndFeel class, 742	NumberFormat class, 612
NavigationFilter class, 522	java.text package, 615
introduction, 552	NumberFormatter class, 566
restricting caret movement example	
552, 554	0
navigationFilter property	Observer design pattern
JTextComponent class, 523	delegation-based event handling, 17, 18
next() method	event listeners as observers, 19
ElementIterator class, 611	OceanTheme class
HTMLDocument.Iterator class, 609	introduction, 774
nextLeaf property	oneTouchExpandable property
DefaultMutableTreeNode interface, 663	JSplitPane class, 386, 388
nextNode property	opaque property
DefaultMutableTreeNode interface, 663	JComponent class, 70, 78
nextSibling property	JDesktopPane component, 263
DefaultMutableTreeNode interface, 663	JTextComponent class, 525
nextValue property	openIcon property
JSpinner class, 510	DefaultTreeCellRenderer class, 635
SpinnerDateModel class, 515	optimizedDrawingEnabled property
SpinnerListModel class, 516	JComponent class, 70, 78
SpinnerNumberModel class, 517	JLayeredPane class, 242
nodeChanged() method	JRootPane class, 237
DefaultTreeModel class, 668	JViewport class, 412
nodesChanged() method	OptionPaneUtils class
DefaultTreeModel class, 668	creating narrow JOptionPane, 281, 282
nodeStructureChanged() method	getSelection() method, 273, 274
DefaultTreeModel class, 668	options property
nodesWereInserted() method	JOptionPane class, 271, 281
DefaultTreeModel class, 668	optionType property
nodesWereRemoved() method	JOptionPane class, 270, 281
DefaultTreeModel class, 668	orientation property
non-AWT upgraded components, 5	JProgressBar component, 440
normalBounds property	JScrollBar component, 426
JInternalFrame class, 255	JSeparator class, 175
note property	JSlider component, 431
ProgressMonitor class, 296	JSplitPane class, 386
notify-field-accept action	JToolBar class, 203
extra action for JTextField,	outsideBorder property
JFormattedTextField, and	CompoundBorder class, 227
IPasswordField, 587	OvalPanel class, 391

OverlayLayout class	pasteAction class constant
introduction, 365–370	DefaultEditorKit class, 592
overwriteMode property	path property
MaskFormatter class, 620	DefaultMutableTreeNode interface, 663
	TreePath class, 671
P	pathByAddingChild() method
padding	TreePath class, 671
GridBagConstraints class, 356	pathCount property
page property	TreePath class, 671
JEditorPane class, 575	percentComplete property
paint() method	JProgressBar component, 441
JComponent class, 69	placeholderCharacter property
paintBorder() method	MaskFormatter class, 620
AbstractBorder class, 217, 232	plaf, 2
Border interface, 212	PlainDocument class, 60, 521
JComponent class, 69, 70	implementation of Document
paintChildren() method	interface, 526
JComponent class, 69, 70	as data model for JTextArea, 570
paintComponent() method	introduction, 541, 542
JComponent class, 69, 70	PlainView view
JPanel class, 111	BasicTextAreaUI interface, 60
paintIcon() method	Popup class
Icon interface, 93	creating, 200
paintImmediately() method	pop-up menu usage example, 182–184
JComponent class, 70, 78	pop-up usage example, 200–202
paintingTile property	pop-up window
JComponent class, 78	showing JFileChooser in, 326
paintLabels property	PopupFactory class
JSlider component, 431	creating Popup objects, 200
paintTicks property	popupMenu property
JSlider component, 431	JMenu class, 172
paintTrack property	PopupMenuEvent event
JSlider component, 431	PopupMenuListener class, 180
Panel class	PopupMenuListener class
displaying the menu choices, 179	watching for pop-up menu visibility, 180
paragraphAttributes property	popupMenuListeners property
JTextPane class, 581	JComboBox class, 492
ParagraphConstants class	JPopupMenu class, 179
keys for attributes, 598	popupMenuVisible property
TabSet attribute, 603	JMenu class, 172
parent property	pop-ups, 267
DefaultMutableTreeNode interface, 663	JOptionPane class
JComponent class, 77	automatically creating in pop-up
parentPath property	window, 274–280
TreePath class, 671	creating, 268–271
password property	customizing look and feel, 287–291
JPasswordField class, 564	displaying, 271–274
paste() method	introduction, 267–268
JTextComponent class, 534	properties, 280–287
*	properties, 200–201

ProgressMonitor class	previousLeaf property
creating, 292	DefaultMutableTreeNode interface, 663
customizing look and feel, 297	previousNode property
introduction, 291–292	DefaultMutableTreeNode interface, 663
properties, 296–297	previousSibling property
using, 293–296	DefaultMutableTreeNode interface, 663
ProgressMonitorInputStream class	previousValue property
creating, 297	JSpinner class, 510
introduction, 297	SpinnerDateModel class, 515
properties, 299	SpinnerListModel class, 516
using, 298–299	SpinnerNumberModel class, 517
popupSize property	primary1 property
JPopupMenu class, 179	MetalLookAndFeel class, 773
popupVisible property	primary2 property
JComboBox class, 492	MetalLookAndFeel class, 773
position constants	primary3 property
JOptionPane class, 274	MetalLookAndFeel class, 773
position property	primaryControl property
TabStop class, 604	MetalLookAndFeel class, 773
positioning operations	primaryControlDarkShadow property
JTextComponent class, 526	MetalLookAndFeel class, 773
postEdit() method	primaryControlHighlight property
UndoableEditSupport class, 794	MetalLookAndFeel class, 773
preferredScrollableViewportSize property	primaryControlInfo property
JList class, 465, 466	MetalLookAndFeel class, 773
JTable class, 681	primaryControlShadow property
JTextArea class, 571	MetalLookAndFeel class, 773
JTextComponent class, 523	print() method
JTree class, 629	JTable class, 724, 727
preferredSize property	PrinterException class, 727
DefaultTreeCellRenderer class, 635	printing tables, 724
JComponent class, 78	processKeyEvent() method
JEditorPane class, 575	MenuElement interface, 195
JTextArea class, 571	processMouseEvent() method
JTextField class, 529	MenuElement interface, 195
preferredSizeSet property	progress property
JComponent class, 78	ProgressMonitor class, 296
preferredWidth property	ProgressMonitor class
TableColumn class, 713	creating, 292
preOrderEnumeration() method	introduction, 291–292
DefaultMutableTreeNode class, 665	properties, 296–297
pressed property	using, 293–296
DefaultButtonModel interface, 100	progressMonitor property
pressedIcon property	ProgressMonitorInputStream class, 300
AbstractButton class, 99	ProgressMonitorHandler inner class, 294
previewPanel property	ProgressMonitorInputStream class
JColorChooser class, 307, 308	creating, 297
previous() method	introduction, 297
ElementIterator class, 611	properties, 299
	using, 298–299

PropertiesList example	readOnlyAction class constant
demonstrating tooltips, 488, 490	DefaultEditorKit class, 592
PropertyChangeListener, 420	redo() method
AbstractButton class, 102	CompoundEdit class, 792
as accessory component for JFileChooser	UndoableEdit interface, 790
class, 331, 333	UndoManager class, 784
JOptionPane, 287	registeredKeyStrokes property
listening for JSplitPane property	JComponent class, 79
changes, 390	registerKeyboardAction() method
supported by JFrame class, 246	JTextComponent class, 554
PropertyChangeListener interface	reload() method
event handler for JComponent class, 80	DefaultTreeModel class, 668
using as Observers, 26, 27, 28	remove() method
propertyChangeListeners property	DocumentFilter class, 542
AbstractAction class, 41	JMenuBar class, 158
TableColumn class, 713	JPopupMenu class, 178
UIManager class, 748	removeCellEditorListener() method
PropertyChangeSupport class, 26	CellEditor interface, 654
prototypeCellValue property	removeChooserPanel() method
JList class, 465, 466	JColorChooser class, 320
prototypeDisplayValue property	removeElement() method
JComboBox class, 492	DefaultListModel class, 454
ProxyLazyValue class, 755	removeListenerListener() method
associating with Tree.openIcon setting,	JList class, 476
756, 757	removeNodeFromParent() method
deferring object creation, 755, 756	DefaultTreeModel class, 668
put() method	removeSelectedInterval() method
UIManager class, 747, 758	JList class, 479
putClientProperty() method	removeUpdate() method
JComponent class, 759	DocumentListener interface, 546
putConstraint() method	renderer property
SpringLayout class, 372, 373	JComboBox class, 492
putDefaults() method	renderers, preinstalled
UIDefaults class, 749	JTable class, 695
putProperty() method	reorderingAllowed property
AbstractDocument class, 540	JTableHeader class, 716
	repaint() method

JTabbedPane class, 398

showsRootHandles property	SpinnerModel interface
JTree class, 629, 630	data model for JSpinner, 513
showVerticalLines property	properties, 515
JTable class, 682	SpinnerNumberModel class
showXXXDialog() methods	introduction, 516–517
JOptionPane class, 274, 275	properties, 517
siblingCount property	SpringLayout class
DefaultMutableTreeNode interface, 663	Constraints inner class, 371
simple numeric text field verification	introduction, 371–375
example, 56–57	SpringLayout.Constraints class, 371
SimpleAttributeSet class, 585	setContraints() method, 371
creating, 598	StackOverflowError, 214
implementation of MutableAttributeSet	start property
interface, 595	SpinnerDateModel class, 515
introduction, 597	start() method
properties, 598	Timer class, 35
using, 598–601	startOffset property
SINGLE_INTERVAL_SELECTION mode	HTMLDocument.Iterator class, 609
ListSelectionModel interface, 474	startPosition property
SINGLE_SELECTION mode	AbstractDocument class, 540
ListSelectionModel interface, 474	state of text properties
SINGLE_TREE_SELECTION mode	JTextComponent class implementation
TreeSelectionModel interface, 669	properties, 525
SingleSelectionModel interface	state property
introduction, 161	JCheckBoxMenuItem component, 185
size property	StateEdit class, 783
DefaultComboBoxModel class, 461	as UndoableEdit implementation, 800–801
DefaultListModel class, 453	end() method, 801
JComponent class, 77	example with StateEditable, 801–804
SizeRequirements class, 370	StateEditable interface
SmallAttributeSet class, 595	example with StateEdit class, 801–804
snapToTicks property	implementation of updated document, 800
JSlider component, 431, 434	methods, 800
SoftBevelBorder class, 222	restoreState() method, 801
constructors, 223	stepSize property
SortingFocusTraversalPolicy	SpinnerNumberModel class, 517
FocusTraversalPolicy class, 53	stop() method
spinner property	Timer class, 35
DefaultEditor class, 518	stopCellEditing() method
SpinnerDateModel class	CellEditor interface, 654
getValue() method, 515	storeState method
introduction, 514–515	StateEditable interface, 800
properties, 515	StreamDescriptionProperty constant
	Document interface, 531
SpinnerListModel class	
introduction, 515–516	string property
properties, 516	JProgressBar component, 441
subclassing, 517–518	StringContent class
working with ListEditor class, 519	AbstractDocument.Content
	implementation, 596

stringPainted property	client properties, 759–763
JProgressBar component, 441	introduction, 1
strut, creating, 382–383	layout management, 10, 11
Style interface, 595	menus, 151
introduction, 606	JCheckBoxMenuItem class, 184–189
setting JTextPane text attributes, 580	JMenu class, 168–175
StyleConstants class, 595	JMenuBar class, 157–161
constants, 601–602	JMenuItem class, 162–168
introduction, 601	JPopupMenu class, 176–184
methods, 602–603	JRadioButtonMenuItem class, 189–195
sharing between multiple documents, 596	JSeparator class, 175–176
StyleContext class	menu class hierarchy, 156
introduction, 606	MenuElement interface, 195–199
StyleContext.NamedStyle class, 606	SingleSelectionModel interface, 161–162
StyleContext.SmallAttributeSet class, 595	working with, 152–156
StyledDocument interface, 521	pop-ups, 200–202
Document interface extension of, 595	toolbars, 151
extending Document interface, 595	JToolBar class, 202–208
implemented by DefaultStyledDocument	Swing components, 2
class, 596	See also text components
loading JTextPane class with content,	AbstractButton class, 98–103
582–583	AWT component replacements, 3
manages Style objects, 595	chapter mapping, 12
using with JTextField class, 530	containers compared to AWT
styledDocument property	containers, 235
JTextPane class, 581	delegates, 763–765
StyledDocument.NamedStyle class, 595	distinction between equivalent AWT
StyledEditorKit class	components, 3
finding actions, 591	event handling, 10–11
styleNames property	GrayFilter class, 97
DefaultStyledDocument class, 596	Icon interface, 92–94
subElements property	ImageIcon class, 94–97
JMenu class, 172	JButton class, 104–110

MetalLookAndFeel class, 773	introduction, 690
	leaving TableColumn in, 712
	ordering stored columns of data, 676
tabCount property	sorting JTable elements, 700–707
JTabbedPane class, 399	using column order of, 678
tabLayoutPolicy property	TableModelEvent class
JTabbedPane class, 399	properties, 699
table property	TableModelListener interface
JTableHeader class, 716	list managed by AbstractTableModel
	class, 691
	listening to JTable events, 699

tables, 675	JPasswordField class, 563-566
editing table cells	JTextArea class, 570–580
creating complex cell editor, 722–724	JTextComponent class, 523-526
creating simple cell editor, 718–722	JTextField class, 526–563
editing table cells, 718–724	JTextPane class, 580–583
introducing, 675–676	listing actions, 586–589
JTable class, 677–690	overview, 521–522
JTableHeader class, 715–718	using actions, 585–586, 589–591
printing tables, 724–727	text justification
TableColumnModel interface	TitledBorder class, 230
DefaultTableColumnModel class,	text property
708–709	AbstractButton class, 99
listening to JTable events with	JEditorPane class, 575
TableColumnModelListener,	JLabel class, 89
709–712	JTextComponent class, 524
TableColumn class, 712–715	TextAction class, 522, 585
TableColumnModel interface, 707–708, 712	as extension of AbstractAction class, 535
TableModel interface, 690	listing text actions, 587
AbstractTableModel class, 691–696	provides concrete Action
DefaultTableModel class, 696–700	implementations, 585
sorting JTable elements, 700–707	Swing-specific event handling, 37
tabPlacement property	using, 586
JTabbedPane class, 399	TextField class
tabRunCount property	selectionBackground property, 547
JTabbedPane class, 399	textField property
TabSet attribute	DefaultEditor class, 518
ParagraphConstants class, 603	textHighlightColor property
TabSet class	MetalLookAndFeel class, 773
introduction, 603	textNonSelectionColor property
tabSize property	DefaultTreeCellRenderer class, 635
JTextArea class, 571	textSelectionColor property
TabStop class	DefaultTreeCellRenderer class, 635
alignment settings, 604	TextUI interface, 60
creating, 603	TextUtilities class, 537
introduction, 603	thickness property
properties, 604	LineBorder class, 220
using, 605–606	Timer class
tag property	creating objects, 34
HTMLDocument.Iterator class, 609	notifying an ActionListener after a
tearOff property	predefined number of milliseconds,
JMenu class, 172	34, 35
text capabilities, 585	properties, 35–36
creating styled text, 595–607	using objects, 35
editor kits, 607–612	tipText property
JFormattedTextField component, 612–621	JToolTip class, 85
using actions, 585–594	title justification
text components	TitledBorder class, 230
finding actions, 591–594	title positioning
IFormattedTextField class, 566–570	TitledBorder class, 231

title property	ToolTipTreeCellRenderer class, 642
JInternalFrame class, 255	topComponent property
TitledBorder class, 229	JSplitPane class, 386
titleColor property	topLevelAncestor property
TitledBorder class, 229	JComponent class, 78
TitledBorder class, 227	topLevelMenu property
configuring properties, 229	JMenu class, 172
creating, 228	totalColumnWidth property
customizing look and feel, 232	DefaultTableColumnModel class, 709
titleFont property	Transferable interface
TitledBorder class, 229	creating transferable image object, 734
titleJustification property	java.awt.datatransfer package, 733
TitledBorder class, 229	methods, 733
titlePosition property	transferFocus() method
TitledBorder class, 229	Component class, 55
toArray() method	transferFocusBackward() method
DefaultListModel class, 460	Component class, 55
toggle buttons, 115	transferFocusDownCycle() method
	Container class, 55
ButtonGroup class, 116–118	
JCheckBox class, 125–134	transferFocusUpCycle() method
JRadioButton class, 134–149	Component class, 55 TransferHandler class
JToggleButton class, 119–125	
ToggleButtonModel class, 115–116	canImport() method, 734
ToggleButtonModel class	createTransferable() method, 735
button model for JRadioButtonMenuItem	creating a transferable image object, 734
components, 189	importData() method, 735
data model for JCheckBoxMenuItem	introduction, 731
class, 184	transferHandler property
defining JToggleButton structure, 119	JComponent class, 79
introduction, 115–116	translate() method
ToggleButtonUI class	Graphics class, 214
defining JToggleButton structure, 119	tree nodes
toggleClickCount property	creating proper ComboBox editor for a
JTree class, 629, 630	tree, 648
toIndex property	DefaultMutableTreeNode class, 661–664
TableColumnModelEvent class, 709	editing, 643
toolkit property	with CellEditor interface, 644
JComponent class, 79	with DefaultCellEditor class, 645
ToolTipManager class	with DefaultTreeCellEditor class, 647
adding element level tooltips, 488	with TreeCellEditor interface, 644
disabling, 87	MutableTreeNode interface, 660
properties, 87	traversing trees, 664
registering component with, 641	TreeNode interface, 659
sharedInstance() method, 86	tree tooltips
unregistering table, 689	working with, 641–643
tooltips	TreeCellEditor interface, 644
PropertiesList example, 488, 490	creating CheckBoxNodeEditor class,
toolTipText property	653–658
JComponent class, 79	editing table cells, 718

editing tree nodes, 623, 644	TreeWillExpandListener interface, 673
getTreeCellEditorComponent() method,	treeWillExpandListeners property
648, 656	JTree class, 629
TreeCellRenderer interface	trimToSize() method
creating custom renderer, 637–641	DefaultListModel class, 460
DefaultTreeCellRenderer class, 635	type property
implementations, 623	ListDataEvent class, 454
introduction, 634	TableModelEvent class, 700
TreeExpansionEvent class, 672	
TreePath getPath() method, 673	U
TreeExpansionListener interface, 672	UI delegates
treeExpansionListeners property	adding, 771–772
JTree class, 629	creating, 763–766
treelock property	UI property
JComponent class, 79	AbstractButton class, 99
TreeModel interface	JColorChooser class, 307
DefaultTreeModel class implements, 667	JComboBox class, 492
introduction, 667	JDesktopPane component, 263
getRoot() method, 666	JFileChooser class, 327
storing within DefaultTreeModel class, 624	JInternalFrame class, 255
working with tree nodes, 659	JLabel class, 90
TreeModelEvent class	JList class, 465
notifying registered listeners, 668	JMenuBar class, 159
TreeModelListener interface	JMenuItem class, 164
DefaultTreeModel class manages, 667	JOptionPane class, 281
reporting changes to model, 668	JPopupMenu class, 179
TreeNode interface	JProgressBar component, 441
nodes of JTree are implementations of, 624	JRootPane class, 237
traversing trees, 664	JScrollBar component, 426
working with tree nodes, 659	JScrollPane class, 407
TreePath class, 624	JSeparator class, 175
introduction, 671–672	JSlider component, 431
trees	JSpinner class, 510
additional expansion events, 672-673	JSplitPane class, 386
editing tree nodes, 643–659	JTabbedPane class, 399
introduction, 623-624	JTable class, 682
JTree class, 624–634	JTableHeader class, 716
TreeCellRenderer interface, 634–643	JTextComponent class, 524
TreeModel interface, 667	JToolBar class, 203
TreeSelectionModel interface, 668-672	JToolTip class, 85
working with tree nodes, 659–667	JTree class, 629
TreeSelectionEvent class, 671	JViewport class, 412
TreeSelectionListener interface, 671	UIClassID property
treeSelectionListeners property	JButton class, 105
JTree class, 629	JCheckBox class, 127
TreeSelectionModel interface	JCheckBoxMenuItem component, 185
DefaultTreeSelectionModel class, 670	JColorChooser class, 307
introduction, 668-670	JComboBox class, 492
tree selection management, 624	JDesktopPane component, 263

JEditorPane class, 575	get() method, 758, 763
JFileChooser class, 327	getInstalledLookAndFeels() method
JFormattedTextField class, 567	743, 776
JInternalFrame class, 255	getter methods, 747
JLabel class, 90	introduction, 747
JList class, 465	properties, 748, 813–846
JMenu class, 172	put() method, 758
JMenuBar class, 159	setLookAndFeel() method, 743
JMenuItem class, 164	UIManager.LookAndFeelInfo class, 741
JOptionPane class, 281	getInstalledLookAndFeels() method, 742
JPasswordField class, 564	introduction, 749
JPopupMenu class, 179	UIResource interface, 741
JProgressBar component, 441	classes that implement, 753–754
JRadioButton class, 136	introduction, 753
JRadioButtonMenuItem component, 191	UIResource properties, fetching, 72
JRootPane class, 237	Undo Framework, 783
	,
JScrollBar component, 426 JScrollPane class, 407	Command design pattern, 788, 789
	components, 789 AbstractUndoableEdit class, 791
JSeparator class, 175	
JSlider component, 431	CompoundEdit class, 791
JSpinner class, 510	defining custom undoable class, 795–800
JSplitPane class, 386	UndoableEdit interface, 789–790
JTabbedPane class, 399	UndoableEditEvent class, 794
JTable class, 682	UndoableEditListener interface, 794
JTableHeader class, 716	UndoableEditSupport class, 794
JTextArea class, 571	UndoManager class, 792, 793
JTextField class, 529	using an outside object to manage Undo
JTextPane class, 581	states, 800
JToggleButton class, 120	example, 801–804
JToolBar class, 203	StateEdit class, 801
JToolTip class, 85	StateEditable interface, 800
JTree class, 629	using with Swing text components, 784–788
JViewport class, 412	working with, 783, 784
uiClassID property	undo() method
JComponent class, 79	CompoundEdit class, 792
UIDefaults class	UndoableEdit interface, 790
inner classes, 755	UndoManager class, 784
introduction, 71, 749	undoable program example, 795–800
listing properties within JTable, 749–752	UndoableDrawingPanel class, 797
UIDefaults.ActiveValue class, 755	UndoableEdit command
look and feel properties stored as, 741	posting to UndoableEditListener
UIDefaults.LazyValue class, 755	objects, 801
look and feel properties stored as, 741	UndoManager class, 788, 799
UIDefaults.ProxyLazyValue class, 755	UndoableEdit interface, 788
UIManager class	creating, 797
addAuxiliaryLookAndFeel() method, 776	definition, 789
checking component settings in	flow between states, 790
UIDefaults lookup table, 72	StateEdit class implementation, 800
currently installed look and feel classes	UndoableEditEvent class
provided by, 741	edit property, 794

UndoableEditEvent event userObject property UndoableEditListener interface, 794 DefaultMutableTreeNode class, 640, 666 UndoableEditSupport class, 794 DefaultMutableTreeNode interface, 663 UndoManager class, 793 userObjectPath property undoableEditHappened() method DefaultMutableTreeNode interface, 663 listener objects, 794 userTextColor property UndoableEditListener interface, 794 MetalLookAndFeel class, 773 attaching to document of component, 784 userTextFont property managing objects with MetalLookAndFeel class, 774 UndoableEditSupport class, 794 V UndoableEditEvent event, 794 validateRoot property UndoableEditSupport class, 794 ITextField class, 529 UndoManager class, 784 valid property undoableEditListeners property HTMLDocument.Iterator class, 609 AbstractDocument class, 540 JComponent class, 79 UndoableEditSupport class, 801 validateRoot property addUndoableListener() method, 794 JComponent class, 79 beginUpdate() method, 794 IRootPane class, 237 endUpdate() method, 794 JScrollPane class, 407 managing UndoableEditListener JSplitPane class, 386 objects, 794 validCharacters property postEdit() method, 794 MaskFormatter class, 620 UndoableEditListener listener, 794 value property UndoManager class, 783 BoundedRangeModel interface, 419 extending to expose UndoableEdit list, 794 JFormattedTextField class, 567 managing undo and redo capabilities for JOptionPane class, 281, 285 Swing text components, 784 JProgressBar component, 441 methods, 792 JScrollBar component, 426 UndoableEdit command, 788 JSlider component, 431 UndoManagerHelper class, 785 JSpinner class, 510 definition, 785, 787 SpinnerDateModel class, 515 using the Undo Framework with the Swing SpinnerListModel class, 516 text components, 787 SpinnerNumberModel class, 517 uninstallChooserPanel() method valueForPathChanged() method AbstractColorChooserPanel class, 313 TreeModel interface, 667 unitIncrement property valueIsAdjusting property JScrollBar component, 422, 426 BoundedRangeModel interface, 420, 424 updateChooser() method DefaultListSelectionModel class, 475, 683 AbstractColorChooserPanel class, 313 JList class, 465 updateComponentTreeUI() method JScrollBar component, 426 SwingUtilities class, 743 JSlider component, 431 updateUI() method ListSelectionEvent class, 476 changing look and feel setting of Vector class component, 813 creating JTree from, 625-627 upFocusCycle() method KeyboardFocusManager class, 55
